

CHURCHES

BENEFITS

- Attractive, functional, and flexible design capabilities
- Open (clear span) frames depending on width
- Low lifetime maintenance
- Quick construction
- Designed specifically for your county and state
- Perfect for sanctuaries, activities & life centers, fellowship halls

COMMON SPECS

SIZES

Common church sizes are: 50x80, 50x100, 60x80, 60x100. However, we can design your building to be whatever size you need.

BUILDING OCCUPANCY

Standard: Normal occupancy which allows 300 people or less. Let us know how many people you will be expecting in your building at a time.

DOORS

Most churches will have 3070, 4070, or 6070 doors with panic hardware and closers. We can also provide framed openings if you choose to source your own door.

GUTTERS/DOWNSPOUTS

Arco can provide gutters and downspouts to help with rain diversion.

WINDOWS

Arco can provide 3x3, 4x3, and 6x3 insulated horizontal, sliding glass windows. If you would like a different size, we can provide the framed opening and you will be responsible for sourcing the window.

CANOPIES/OVERHANGS

If you are wanting a canopy, overhang, lean-to, etc., Arco can design your building to include this at an additional cost.

INSULATION

Arco can provide R-10 up to R-42 insulation.

ROOF PITCH

Churches will typically have a 3:12 or 4:12 roof pitch. However, Arco can provide 1:12-6:12.
